Dunn 206

Debra T. Burhans, Ph.D.

Director, Bioinformatics Program

Canisius College

Title: Bioinformatics

Abstract: In this talk I will give a brief overview of bioinformatics, including the relationship of this relatively new field to existing academic disciplines. I will present some of the current computational challenges in bioinformatics as well as discussing my own work, which has been focused on the analysis of microarray data to identify physical clusters of genes in budding yeast.
