1. What is output of the following program?

```java
import java.awt.*;
public class Something {

    public static void main (String [] args) {
        int x = 7;
        Point p = new Point(2,3);
        System.out.println(x);
        System.out.println(p);
        anotherMethod(x, p);
        System.out.println(x);
        System.out.println(p);
    }

    public static void anotherMethod(int x, Point y) {
        x = x + 8;
        p.translate(1,1);
    }
}
```

2. Write a code segment (not an entire program) to prompt the user for an integer, read it into the program and print out a value one greater than the value read in.
