1. What is output of the following program?

```java
import java.awt.*;
public class Something {
    public static void main (String [] args) {
        int x = 7;
        Point p = new Point(2,3);
        int y = x;
        Point q = p;
        y += 1;
        q.translate(1,1);
        System.out.println(x);
        System.out.println(y);
        System.out.println(p);
        System.out.println(q);
    }
}
```

2. Write a code segment (not an entire program) to prompt the user for a String, read it into the program and print the String out again.
